

Instructions for VR-4GB

Welcome

Thank you for purchasing the new top of the line VR-4GB. The following product manual will help you to install and operate your new device. Please be sure to fully read the directions before proceeding to use your new VR-4GB.

Operation

- 1.) Before using this product please ensure that all accessories were included in the packaging and that the product is fully charged before use.
- 2.) To begin recording with the VR-4GB all you need to do is flip the On/Off switch to the On position and the unit will automatically begin to record. When you flip the switch to the Off position it will automatically save your current recordings and then power down.
- 3.) To recover your data simply remove the cover on the USB connector and plug the device into your PC. Windows should automatically detect the USB device allowing you to not only recover your files but to use the drive as a standard mass storage device.
- 4.) To set the time and date stamp, plug the device into your computer. When the device is recognized you should see your Voice Recorder Manager software as well as a file called Time and Date. Double click this file and it will automatically sync with the time on your PC.
